

# Mergers & Acquisitions Technology Integration Solutions

*The expertise you need to reduce your M&A technology risk*

THE  
END  
OF M&A  
IT CHAOS

The IT integration process after a merger is fraught with numerous pitfalls. These obstacles can prevent you from achieving the synergies and ROI you originally anticipated.

Ensunet partners with your technology department and transaction team, enabling you to leverage the best practices we've honed after working on multiple M&A IT integration projects for enterprise clients.

Our highly experienced M&A IT experts streamline the integration process. They can also provide you with accurate cost estimates for integrating the new company into your technology infrastructure and business processes.

## A Plan That Leads To A Successful IT Integration

We believe in delivering solid ROI, not excuses. Ensunet offers expert assessments that help you understand what investments you'll need to make to integrate your people and business processes.

### Due Diligence / Pre- and Post-Transaction Assessment Services

#### Conducting initial reviews

- Assess connectivity and determine new hardware and software needs.
- Initiate the process to obtain new hardware with long lead times.

#### Performing security remediation

- Develop a project scope to address vulnerabilities that were identified by a security scan of the new environment.
- Initiate security remediation activities, i.e., securing the desktop environment, the network configuration, and the firewalls.

#### Analyzing the network environment

- Analyze the environment to establish the network topology.
- Develop recommendations to standardize the LAN.
- Design a new network.
- Initiate the capital approval process to purchase standard hardware.
- Coordinate or perform the installation of new hardware and business critical applications to verify secure architecture.

# Mergers & Acquisitions Technology Integration Solutions

*The expertise you need to reduce your M&A technology risk*

## A Collaborative Approach That Yields Effective Results

We believe in rapid implementation, not lengthy projects. Ensunet works with your existing personnel to minimize the impact to daily business operations.

### Post-Transaction Implementation Services

#### Enterprise Level

- Transform the acquired LAN to your standard network infrastructure
- Re-IP the servers and devices before migrating the infrastructure to your standard architecture
- Install new Help Desk programs
- Migrate the Help Desk and related service offerings to your Help Desk platform
- Gather and move all hardware and software assets, as well as maintenance contracts, into your management databases
- Design and install audio visual systems and structured cabling
- Establish a road map to migrate all servers to your hosting network

#### End User Level

- Migrate desktops to your corporate standard
- Migrate employee email accounts
- Migrate mobile devices

### About Ensunet

Ensunet offers specialized pre- and post-transaction IT M&A integration solutions that provide high-level strategic value to shareholders and other key stakeholders. Our customers include multinational Fortune 300 companies as well as federal and state agencies and municipalities.

## Workforce Support That Reduces Employee Overwhelm

We believe in partnering, not in taking over. Ensunet brings in the talent you need to meet the increased operational demands during a M&A IT integration.

Integrating IT systems can quickly overwhelm the capacity of your technology personnel, leading to increased feelings of frustration and a spike in employee turnover. Ensunet helps you retain key technology staff by adding operational and technical experts to your team who possess significant experience with M&A IT integration projects.

- System Engineers
- Network Architects
- Desktop Support
- ERP Architects
- Software Engineers
- Data Migration Engineers
- IT Project & Program Managers
- Cyber Security Engineers
